What information do you want to export?

☐ Citation information	☐ Bibliographical information	☐ Abstract & keywords	☐ Funding details	☒ Other information
☐ Author(s)	☐ Affiliations	☐ Abstract	☐ Number	☐ Tradenames & manufacturers
☐ Document title	☐ Serial identifiers (e.g. ISSN)	☐ Author keywords	☐ Acronym	☐ Accession numbers & chemicals
☐ Year	☐ PubMed ID	☐ Indexed keywords	☐ Sponsor	☐ Conference information
☐ EID	☐ Publisher		☐ Funding text	☐ Include references
☐ Source title	☐ Editor(s)			
☐ Volume, issues, pages	☐ Language of original document			
☐ Citation count	☐ Correspondence address			
☐ Source & document type	☐ Abbreviated source title			
☐ Publication stage				
☐ DOI				
☐ Open access

[Export](#)

Open CVS file from downloads and use to copy/paste information on Year, Title, Source Title into the UTN publication overview. (Note, Scopus does not list number of authors in the downloadable list, there is a count on the right hand side of the database entry when you open the entries individually - see below - tap on “show all information”. This also shows you the author affiliations)

Open each individual entry on Scopus and check whether the article/book/research output lists international collaborators and how many authors - tap on “show all information”. This also shows you the author affiliations.

Copy information over into the UTN joint publications sheet. Note: we only list international collaborations, if publications only have collaborators with German institutions, don't record it on the joint publications list - this list will differ from google scholar or other records.

A publication with 5 different international partner institutions will also be recorded 5 times not once. We are looking at tracking institutional collaborations.
